Art Unit: 1743

In response to the 1/26/05 interview, the Office acknowledges citation of the incorrect penultimate paragraph that should have explained why a first action final is proper. The correction will be made and the period for response restarted with the re-mailing of this final Office action.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 1-27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The 3/15/04 amendments to the independent add the limitation "... wherein the first and second indicia's are independent of size". The claim is vague and indefinite what relationship between the indicator and size is intended.

Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-27 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Beebe et al.

Beebe et al. teach a microfluidic device using a hydrogel, a photo-initiator, a cross-linker and a pH indicator to optically determine fluidic characteristics. Column 11 lines 18+ teach a pH sensitive polymer mixture hydrogel(308) that has been read on the

Art Unit: 1743

claimed immobilized dye. Column 34 lines 32-42 teach a change in optical properties in response to the detection of changes in pH.

Response to Arguments

Applicant's arguments filed 3/15/04 have been fully considered but they are not persuasive.

Applicants remarks directed to McDevitt et al. and this rejection has been vacated.

Applicants state Bebbe et al. fails to teach colorimetric indicia. Applicants characterized Bebbe et al. on the second page of their response in the paragraph bridging the first and second pages a " ... second component to produce a colored change ...". Additionally, Bebbe et al. teach in column 34 lines 32-42 a change in optical properties as a result of changed in pH.

Applicants state Bebbe et al. fails to teach immobilizing a dye within a hydrogel. Bebbe et al. teach in column 11 lines 18+ teach a pH sensitive polymer mixture hydrogel(308) that has been read on the claimed immobilized dye.

Finally, Applicants state with respect to claims 1 and 10, Bebbe et al. fails to teach mixing a dye into a prepolymer mixture and placing the mixture into a channel. These remarks are not commensurate in scope with these claims. However, Bebbe et al. teach in column 11 lines 18+ teach a pH sensitive polymer mixture hydrogel(308) that would meet these limitations if later claimed.

Conclusion

Art Unit: 1743

All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
